

## **Tenkoz' Standard Operating Procedure 100-1: Pre-filling Bulk or Mini-Bulk Containers with Tenkoz' EPA- Registered Products**

1. Containers will be filled only with product produced for Tenkoz Inc.
2. Producer agrees that it shall not adulterate or otherwise alter, amend, or change in any manner whatsoever the chemical composition of the pesticide and ensures that the formulation conforms to the statement of formulation accepted and approved by the US EPA.
3. Containers must be inspected to be sure that (1) each container is suitable for the product being placed in it, (2) each container is in good repair and meets all state, federal, and local regulations, and (3) each container is empty and properly cleaned.
4. Only product labels will be used that have been supplied by or agreed to by Tenkoz.
5. Labels will be placed on the containers in conformance with EPA and DOT regulations.
6. On the product labels provided by Tenkoz, there is a blank space after "Net Contents" which must be filled in by designating the quantity of product in the container. This can be accomplished by using either preprinted quantity stickers or by writing in the quantity with waterproof ink. **The correct Net Contents (quantity) must be added to the product label before the product is shipped.**
7. On the product labels provided by Tenkoz, there are either (1) multiple EPA Establishment Nos. and you must check/identify the site/Est. No. at which the container was produced with waterproof ink; or (2) a single EPA Est. No. identifying the site at which you are pre-filling the container. **Your EPA Establishment No. must be clearly identified on the product label before the product is shipped.**
8. Apply two labels to the tank...one over the valve and one on the opposite side (both need to have the Net Contents filled in and the EPA Est. No. identified).
9. Producer agrees to review this SOP with all employees who will be involved in filling containers for Tenkoz.
10. If any questions arise regarding this procedure, please call Tenkoz at 770-343-8509 immediately.
